## Abstract of JP2003345953 (A)

**PROBLEM TO BE SOLVED:** To provide an inter-group information sharing system allowing a in-group information sharing device to share information in a group and sharing the information among groups while suppressing the communication traffic volume between the in-group information sharing devices. ; **SOLUTION:** An in-group information sharing server 16 obtains inter-group common information, users' IDs of one or more users sharing the inter-group common information, and a server ID of an in-group information sharing server 16. The inter group common information, the users' IDs, and the server ID are transmitted to the group-inside information sharing server 16 corresponding to the server ID to be obtained. ; **COPYRIGHT:** (C)2004,JPO
